

RINANZE TOKEN – PHASE 1 HANDOVER

Date: August 1, 2026

1. TOKEN 1: MAIN RINANZE (MANUAL UUPS PROXY)

Contract Address:

0xBdf9e9B29720389EeBf9b6D95a5077341E66114c

Minting Control:

■ Full control (MINTER_ROLE + DEFAULT_ADMIN_ROLE held by deployer).

Price Control:

■ Price shows on DexScreener & Trust Wallet sub-menu. ■ Not auto-displayed on Trust Wallet main dashboard.

Way Forward (To unlock main dashboard display):

- Must meet strict Trust Wallet GitHub asset listing requirements:
 - On-chain Transactions: Minimum of 15,000.
 - Unique Holders: Minimum of 10,000.
 - PR Fee: 500 TWT or 2.5 BNB (non-refundable processing fee) via GitHub submission.

2. TOKEN 2: FLAP RINANZE (LAUNCHPAD PROXY)

Contract Address:

0xec7f676abd0fe12163bdf4a2ad93514637b17777

Minting Control:

■ Renounced (Owner is 0x000...). Supply is permanently fixed.

Price Display:

■ Queued for auto-display on Trust Wallet main dashboard via Flap's backend integration.

Way Forward (To activate/graduate):

- The token must be traded internally on Flap until the bonding curve reaches 16 BNB.
- Cost estimate: ~\$9,400 USD (~■13 million Naira).
- Once hit, Flap auto-creates external liquidity pools and forces recognition on Trust Wallet.
